

**The largest school districts, libraries and universities use Canopy to simplify network management, increase security and reduce support cost.**

#### **Does your network have a strong foundation?**

Is your migration to Windows 2000 complete?  
Are Active Directory Services fully deployed?

#### **Is your network secure?**

Do your students authenticate at log in?  
Do you provide executables protection?  
Are your backup routines automated?

#### **Is your network easy to manage?**

Are your Macs and PCs managed under one umbrella?  
Do students have centralized storage?  
Do you have centralized network management?  
Are routine network administration tasks automated?

#### **Is your network easy to use?**

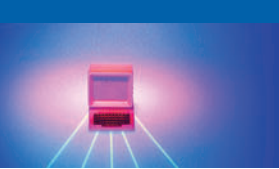

Can students access files from any desktop?  
Do students get the same desktop icons as they move from desktop to desktop?  
Can teachers deliver and collect homework assignments digitally?

#### **Is your network easy to support?**

Can you get hotline support from Certified Network Engineers when you need it?

Canopy is a suite of network services designed to simplify school network management, increase security and reduce support costs. Tangent's Certified Network Engineers make it easy and cost effective to deploy and manage Active Directory Services in your school network environment.

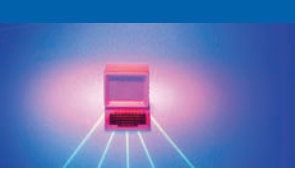

**The business of managing your school network never ends. With Canopy, Tangent makes it easier and saves you money.**

## CANOPY

## BENEFITS

- >> **Authentication** at login. Define Group Policy for groups or individual users. Provide network-based security.
- >> **Unite Your Macs and Windows PCs** under one simple network management umbrella using Active Directory and Group Policy.
- >> **Secure Desktops.** Assign permissions for internet access. Protect your desktops from unauthorized downloads, application installations or control panel changes.
- >> **Centralized Storage.** Allow students to access home directory or application data files from any desktop on the network.
- >> **Centralized Network Management.** Manage all your desktops from a central point. Implement desktop changes from the server level instead of running from desktop to desktop. Simplify and automate standard school network administration tasks.
- >> **Deploy Active Directory Services Quickly.** Make revisions via simple on-line request forms.
- >> **Send Homework Electronically.** Students and teachers send, receive and archive homework, and create digital portfolios via drag and drop.
- >> **Certified Network Support.** Certified Network Engineers provide hotline support for fast resolution to your network support incidents.
